SEWER & MAINTENANCE WORKER I/II

*Class specifications are intended to present a descriptive list of the range of duties performed by employees in the class. Specifications are **not** intended to reflect all duties performed within the job.*

DEFINITION

Under general supervision, performs a variety of semi-skilled and skilled tasks in the upkeep, maintenance, and repair of collection system and lift stations; performs related work as assigned.

CLASS CHARACTERISTICS

Sewer & Maintenance Worker I: This is the journey level class in the Sewer Service and Maintenance Worker series; engaged in the maintenance and repair of sewer collection system and lift stations; operate heavy construction equipment, vector truck, dump truck, and backhoe.

Sewer & Maintenance Worker II: Incumbents assigned to this class are responsible for leading a crew engaged in the maintenance and repair of sewer collection system and lift stations; operate heavy equipment such as the vector truck, dump truck, and backhoe and perform the more skilled duties and responsibilities.

ESSENTIAL FUNCTIONS

The duties listed below are intended only as illustrations of the various types of work that may be performed. The omission of specific statements of duties does not exclude the position if the work is similar, related or a logical assignment to the class.

These functions may not be present in all positions in multiple position classes. When a position is to be filled, the essential functions will be noted in the announcement of position availability. Letters in parenthesis at the end of each function statement represent the abilities required to perform that function.

Repairs and maintains sewer collection systems, mains, laterals, manholes, lift stations, pressure lines and related structures; loads and unloads trucks; operates and performs preventive maintenance on pumps, valves and related lift station equipment.

Flushes and clears collection systems; operates hydrovactor, hand, jet and machine rods to clear lines; applies herbicides, foams and other chemicals to deroot, degrease and unstop lines; installs and removes flow meters.

Operates service truck to respond to customer complaints; determines source of problem; clears lines or reports work needed; advises customer if problem is not the District's responsibility; pumps flooded areas.

Observes safe work methods and safety precautions related to the work; flags and cones work sites for traffic control; shores trenches, operates pipe location and gas detection equipment; uses appropriate safety devices and equipment.

Operates and maintains a wide variety of hand and power tools related to the work, including tampers, breaking guns, jackhammers, etc.

Operates a variety of trucks and equipment, including hydrovactors, jet and machine rodders, etc.; inspects vehicles and performs minor maintenance; reports needed repairs.

Estimates and secures tools, materials and equipment necessary to complete assignments; prepares and maintains a variety of written records and reports related to work performed.

Trains less experienced staff and leads the work of assigned staff.

Performs other tasks/functions deemed necessary to the daily operation of the District.
