

4. Assessment

Proposition 218 Compliance

On November 5, 1996 California voters approved Proposition 218 entitled "Right to Vote on Taxes Act" which added Article XIID to the California Constitution. While its title refers only to taxes, Proposition 218 establishes new procedural requirements for the formation and administration of assessment districts.

Proposition 218 does not define this term "streets," however, based on the opinions of the public agency officials, attorneys, assessment engineers, and Senate Bill 919, it has been determined that streets include all public improvements located within the street rights-of-way. This would include median and parkway landscaping, traffic signals, safety lighting, and street lighting.

Proposition 218 defines "assessment" as "any levy or charge upon real property by an agency for a special benefit conferred upon the real property." Cal. Const., art. XIID, §2(b). A special assessment, sometimes called a "benefit assessment," is a charge generally levied upon parcels of real property to pay for benefits the parcels receive from local improvements. Special assessments are levied according to statutory authority granted by the Legislature or, in some instances, local charters. Distinguishing among taxes, fees, and assessments can be difficult and often depends on the context in which the distinction is made. For example, taxes, assessments and property-related fees all may be imposed on property. The key feature that distinguishes an assessment from a tax, fee, or charge is the existence of a special benefit to real property. Without identifying a special benefit, there can be no assessment.

Distinguishing General and Special Benefit

Proposition 218 added a set of procedures and requirements which a local government must follow to levy an assessment. In addition to notice, hearing, and assessment ballot proceedings, Proposition 218 provides that "only special benefits are assessable" and requires a local government to "separate the general benefits from the special benefits conferred on a parcel."

By its nature most every public improvement financed through an assessment district contains an element of public benefit. The test is: does there exist, with relation to the improvement, a special benefit to the property assessed? The law requires that portion of the cost of the improvement which benefits the public generally, to be separated from that portion of the cost of the improvement which specially benefits assessed properties. Proposition 218 provides the following definition of "special benefit":

"Special benefit" means a particular and distinct benefit over and above general benefits conferred on real property located in the district or to the public at large. General enhancement of property value does not constitute "special benefit."

Method of Assessment Apportionment

The "Landscaping and Lighting Act of 1972" and provisions of Article XIID of the California Constitution require that the assessment be apportioned by a formula or method which fairly distributes the net amount among all assessable lots and parcels in proportion to the estimated special benefits to be received by each lot or parcel from the improvements. The act does not specify the method or formula that should be used to apportion the assessment in any special assessment district proceedings. The District has retained the firm of Albert A. Webb Associates for the purpose of assisting the Services District in analyzing the facts in this Assessment District and recommending to the Services District the correct apportionment of the assessment obligation.

In performing the analysis, it was necessary to identify the benefits that the improvements being financed render to the properties within the boundaries of the Assessment District and to determine the extent to which such properties receive a direct and special benefit as distinguished from benefits received by the general

4. Assessment

public. Due to the variation in the nature, location, and extent of the improvements being maintained, the Assessment District consists of two (2) Assessment Zones which will be inclusive of all lots within the Assessment District and combined into one total charge per lot.

Special Benefits

Zone 1 consists of all parcels that have street lighting on the street fronting their lots or parcels. This local lighting is of benefit as it provides increased property protection, personal safety, visibility, traffic safety, and directly enhances the appearance of those lots or parcels fronting upon illuminated streets.

Zone 2 consists of the major streets encompassing the Zone 1 parcels. These lights are much brighter than the local streetlights described in Zone 1 and provide both traffic and pedestrian safety on those major streets and intersections that carry the traffic generated by the Zone 1 parcels. These higher intensity streetlights will additionally benefit the Zone 1 parcels as this lighting will discourage illegal activity at night and will directly enhance the property values.

General Benefits

The streetlights described within the two Assessment Zones are required as a condition of the development of the area encompassed by the Assessment District. The lighting is for the direct benefit and enjoyment of those parcels within the Assessment District; therefore, the improvements do not result in any general benefits.

Public Lands

This Assessment District contains one school site and three well sites which will receive no special benefit from the improvements and will not be assessed.
