

Appendix Q

Procedures Concerning Installation of Dry Utilities

Procedures Concerning Installation of Dry Utilities in Developer Funded Projects

Jurupa Community Services District (District) requires that all dry utilities trenches be inspected by the District's Inspector prior to backfill of the excavation. The District's Inspector will be monitoring for quality assurance, all locations along the excavation that cross the District's facilities such as water services, fire hydrants, air evacuation valves, sewer laterals, along with any other facilities that will be accepted by the District. The Developer shall notify the inspector five working days in advance of any work on the dry utilities in order that inspection may be provided with minimal inconvenience to the District or delay to the Contractor. Any work done around the District's facilities in the absence of the District's Inspector without permission shall be subject to rejection.
