**Jurupa Community Services District and the Inland Empire Utilities Agency
Awarded Over \$12 Million In Grant Funding for Recycled Water Project**

The Project is Critical to the Region’s Long-Term Response to Drought

Inland Empire, CA (August 30, 2022) – Jurupa Community Services District (JCSD) and the Inland Empire Utilities Agency (IEUA) have been awarded \$12.3 million in grant funding from the United States Bureau of Reclamation (USBR) for the Joint IEUA-JCSD Recycled Water Intertie Project (the RWP). The award was made available through USBR’s Title XVI Water Reclamation and Reuse Program.

As California’s drought conditions worsen, the RWP will play an essential role in the region’s long-term response to drought and water conservation. Upon completion, the RWP will produce over 1 billion gallons of recycled water annually. The RWP will offset precious potable water supplies by serving nearly 200 million gallons of recycled water annually to JCSD’s irrigation customers in Eastvale and Jurupa Valley. Irrigation customers include parks, schools, landscape irrigation along streets, and commercial properties.

“As water supplies are increasingly affected by drought conditions, the RWP will improve regional water management and resiliency,” said JCSD General Manager, Chris Berch. “This grant award, which will offset a significant portion of what has been budgeted for the RWP, is an example of JCSD’s commitment to its ratepayers and preserving precious water resources.”

The RWP signifies a regional water partnership between JCSD and IEUA that will secure local water supplies for local customers. Upon completion, IEUA’s service area will receive approximately 800 million gallons per year of recycled water through new infrastructure. The partnership will allow IEUA to utilize this new source of recycled water into their existing system, thus increasing IEUA’s ability to replenish the Chino Groundwater Basin with additional recycled water.

“Improving and increasing recycled water supplies is imperative for our region,” said IEUA General Manager Shivaji Deshmukh. “The RWP is an important part of our Chino Basin Program which includes a series of projects designed to increase local water supply reliability and control. Through this partnership with JCSD on the RWP, we will be better prepared for ongoing drought conditions. We appreciate the USBR recognizing the benefits of the RWP by awarding these needed funds.”

The Bipartisan Infrastructure Law allocates \$8.3 billion for USBR water infrastructure projects to repair aging water delivery systems, secure dams, and complete rural water projects. The funding awarded for the RWP is part of the \$1 billion in WaterSMART Water Recycling and Reuse grants provided by the Law.

For more information, please contact Arman Tarzi, JCSD Community Affairs Supervisor, at (951) 685-7434 or at atarzi@jcsd.us. You can also contact Andréa Carruthers, IEUA Communications Officer, at (909) 993-1935 or at acarruthers@ieua.org.

Founded in 1956, the Jurupa Community Services District is a public governmental agency which provides services and programs to the cities of Jurupa Valley and Eastvale. It is governed by five elected representatives (Board of Directors) from both cities. Serving over 130,000 people in a 40-square-mile area, JCSD provides a variety of community services and programs, including water, wastewater, street lights, frontage landscape maintenance, graffiti abatement, and parks and recreation services.

The Inland Empire Utilities Agency covers 242-square miles, distributes imported water, provides industrial/municipal wastewater collection and treatment services, and other related utility services to people within western San Bernardino County through its customer agencies which include Chino, Chino Hills, Cucamonga Valley Water District, Fontana, Fontana Water Company, Montclair, Monte Vista Water District, Ontario, and Upland. www.ieua.org
