ASSESSMENT ENGINEER
LIGHTING MAINTENANCE
DISTRICT NO. 2001-1
JURUPA COMMUNITY SERVICES DISTRICT
COUNTY OF RIVERSIDE
STATE OF CALIFORNIA

1. Description of Improvements

Generally, the work to be performed consists of the maintenance, repair, acquisition, and replacement of street light poles and fixtures and of the energy charges, operation, maintenance, and administrative costs of the local and major streets streetlighting within the Assessment District (Figures 3-1 through 3-28).

Zone 1 Local Lighting streetlights are located within the boundaries of Zone A, Tract No. 25085-2 (Figure 3-2); Zone B, Tract No. 29490 (Figure 3-3); Zone C, Tract No. 25674 (Figure 3-4); Zone D, Tract No. 28808-1 (Figure 3-5); Zone E, Plot Plan No. 16756 (Figure 3-6); Zone F, Tract No. 28808-2 (Figure 3-7); Zone H, Tract No. 30671 (Figure 3-9); Zone J, Tract No. 29725 (Figure 3-11); Zone K, Tract No. 28808-F (Figure 3-12); Zone L, Tract No. 24686 (Figure 3-13); Zone M, Tract No. 22565 (Figure 3-14); Zone P, Plot Plan No. 16937 (Figure 3-17); Zone R, Tract No. 31301 (Figure 3-19); Zone T, Tract No. 28698 (Figure 3-21); Zone U, Parcel Map No. 31081 (Figure 3-22); Zone V, Tract No. 32124 (Figure 3-23); Zone W, Parcel Map No. 36487 (Figure 3-24); Zone X, Tract No. 31875 (Figure 3-25); Zone Y, Tract No. 31635 (Figure 3-26); Zone Z, Hastings Blvd. and Kenneth St. (Figure 3-27); Zone BB, Tract No 33675 (Figure 3-28); Zone CC, Tract No. 28851 (Figure 3-29); and Zone FF, Plot Plan No. 16216S1 (Figure 3-31), and consists of both 22 watt light-emitting diodes (LEDs), and 39 watt LEDs.

Zone 2 Major Streets streetlights are located along Camino Real, Jurupa Road, Pedley Road, Galena Street, Riverside Drive, Philadelphia Avenue, Granite Hill Drive, Harrel Street, Cantu Galleano Ranch Road, Wineville Avenue, Tyrolite Street, Alta Mar Drive, Milliken Avenue, Armstrong Road, Bellegrave Avenue, Hamner Avenue, Goodman Way, and Mission Boulevard (Figures 3-2 through 3-5, Figures 3-8 through 3-10, Figure 3-12, Figures 3-14 through 3-20, Figure 3-22, Figure 3-24, Figure 3-28, and Figure 3-30), and along Camino Real (Figure 3-18); all are 84 watt LEDs.

The existing streetlight improvements as shown in the Services District Streetlight Maps were purchased in March 2019 from Southern California Edison (SCE), with the exception of a few streetlights that were not available for purchase. The Streetlight Maps are on file in the office of the Director of Finance and Administration of the Services District and are made part of this report to the same extent as if attached hereto.

The streetlights that were purchased were retrofitted with energy-efficient LEDs. The streetlights that could not be purchased are still owned and maintained by SCE; these lamps have also been retrofitted with LEDs.

Annual costs per year provide for:

- Energy costs for street lighting.
- Operation and maintenance of the facilities.
- Maintenance, repair, acquisition, replacement, and retrofit of street light poles and fixtures.
- Incidental costs, including noticing, legal and report preparation expenses, finance department and administration expenses for the processing of revenues and Edison payments, and administration expenses for the maintenance of streetlight maps and monitoring of facilities.

The class, type, and number of streetlights currently designed and installed are listed by benefit zone as follows:

2. Engineer's Estimate of Costs and Expenses

Cost estimates have been prepared for each Zone in the Assessment District.

In 2019 a portion of the streetlights located within the boundaries of the District were purchased from SCE and the lamps were retrofitted with energy-efficient LEDs. Delivery charges, regulatory fees, and generation charges for District-owned streetlights are now calculated using the SCE LS-2 Rate Schedule and an Operations and Maintenance line item was added to the cost estimate tables showing the cost of servicing the District-owned streetlights. Additionally, until the purchase of the streetlights has been fully paid (which is anticipated to occur in 2034), the streetlight acquisition costs have been added to each Zone.

The few streetlights that were not available for purchase remain owned and maintained by SCE; these have also been retrofitted with LEDs. As a result, these few lights are still subject to the LS-1-E Rate Schedule and are not included in the Operations and Maintenance line item nor the streetlight acquisition calculations.

The updates to the cost estimate tables will not cause the assessment rate for any Zone to exceed the Maximum Assessment Rate for that Zone.

The payment for FY 2025-26 for the acquisition of the streetlights purchased by the Services District is \$144,684.96, which is \$75.95 per streetlight.

The estimates of the annual energy, maintenance, and acquisition costs are shown in Tables 2-1 through 2-25.

4. Assessment

Proposition 218 Compliance

On November 5, 1996, California voters approved Proposition 218, entitled “Right to Vote on Taxes Act,” which added Article XIID to the California Constitution. While its title refers only to taxes, Proposition 218 establishes new procedural requirements for the formation and administration of assessment districts.

Proposition 218 does not define the term “streets,” however, based on the opinions of the public agency officials, attorneys, assessment engineers, and Senate Bill 919, it has been determined that streets include all public improvements located within the street rights-of-way. This would include median and parkway landscaping, traffic signals, safety lighting, and street lighting.

Proposition 218 defines “assessment” as “any levy or charge upon real property by an agency for a special benefit conferred upon the real property.” Cal. Const., art. XIID, §2(b). A special assessment, sometimes called a “benefit assessment,” is a charge generally levied upon parcels of real property to pay for benefits the parcels receive from local improvements. Special assessments are levied according to statutory authority granted by the Legislature or, in some instances, local charters. Distinguishing among taxes, fees, and assessments can be difficult and often depends on the context in which the distinction is made. For example, taxes, assessments, and property-related fees all may be imposed on property. The key feature that distinguishes an assessment from a tax, fee, or charge is the existence of a special benefit to real property. Without identifying a special benefit, there can be no assessment.

Distinguishing General and Special Benefit

Proposition 218 added a set of procedures and requirements which a local government must follow to levy an assessment. In addition to notice, hearing, and assessment ballot proceedings, Proposition 218 provides that “only special benefits are assessable” and requires a local government to “separate the general benefits from the special benefits conferred on a parcel.”

By its nature, most public improvements financed through an assessment district contain an element of public benefit. The test is: does there exist, with relation to the improvement, a special benefit to the property assessed? The law requires that portion of the cost of the improvement, which benefits the public generally to be separated from that portion of the cost of the improvement, which specially benefits assessed properties. Proposition 218 provides the following definition of “special benefit”:

“Special Benefit” means a particular and distinct benefit over and above general benefits conferred on real property located in the district or to the public at large. General enhancement of property value does not constitute “special benefit.”

Method of Assessment Apportionment

The “Landscaping and Lighting Act of 1972” and provisions of Article XIID of the California Constitution require that the assessment be apportioned by a formula or method which fairly distributes the net amount among all assessable lots and parcels in proportion to the estimated special benefits to be received by each lot or parcel from the improvements. The act does not specify the method or formula that should be used to apportion the assessment in any special assessment district proceedings. The Services District has retained the firm of Webb Municipal Finance, LLC for the purpose of assisting the Services District in analyzing the facts in this Assessment District and recommending to the Services District the correct apportionment of the assessment obligation.

In performing the analysis, it was necessary to identify the benefits that the improvements being financed render to the properties within the boundaries of the Assessment District and to determine the extent to which such properties receive a direct and special benefit as distinguished from benefits received by the general public. Due to the variation in the nature, location, and extent of the improvements being maintained, the Assessment District

4. Assessment

consists of two (2) Assessment Zones which will be inclusive of all lots within the Assessment District and combined into one total charge per lot.

Special Benefits

Zone 1 consists of all parcels that have street lighting on the street fronting their lots or parcels. This local lighting is of benefit as it provides increased property protection, personal safety, visibility, traffic safety, and directly enhances the appearance of those lots or parcels fronting upon illuminated streets.

Zone 2 consists of the major streets encompassing the Zone 1 parcels. These lights are much brighter than the local streetlights described in Zone 1 and provide both traffic and pedestrian safety on those major streets and intersections that carry the traffic generated by the Zone 1 parcels. These higher intensity streetlights will additionally benefit the Zone 1 parcels as this lighting will discourage illegal activity at night and will directly enhance the property values.

General Benefits

The streetlights described within the two Assessment Zones are required as a condition of the development of the area encompassed by the Assessment District. The lighting is for the direct benefit and enjoyment of those parcels within the Assessment District; therefore, the improvements do not result in any general benefits.

Public Lands

This Assessment District contains a parcel that is owned by the County of Riverside, which is being assessed. The Assessment District also contains a parcel that is owned by the Services District, which is intended to be a well site, and is therefore not being assessed.

Allocation of Special Benefit Assessment

For details regarding the allocation of special benefit, see Cost Estimate Tables 2-1 through 2-25 in Section 2 of the Engineer's Report.

Transfer of specific Annexation Areas to the City of Eastvale: On January 24th of 2022, Annexation Areas G, S, and W were transferred to the administration of the City of Eastvale via Resolution No. 3200 during the regularly scheduled board meeting. Commencing with Fiscal Year 2022-23, the City of Eastvale became responsible for the preparation of the Annual Engineer's Report and the Annual Levy for all Lighting LMD Zones within the City of Eastvale boundaries.

Future Maximum Annual Assessments

The assessments will be levied on an annual basis for as long as the services are rendered and the amount of the assessment to be levied on each such parcel in each subsequent fiscal year shall be increased by the percentage increase, if any, in the cost of electric power which the Services District will pay to Southern California Edison Company, or any successor thereto, for electric power for the operation and maintenance of the streetlights for each such fiscal year, so that the total amount of the assessments on all such lots and parcels will not be less than the Services District's costs, including the cost of electric power, for the operation and maintenance of streetlights in each such fiscal year. For Fiscal Year 2025-26, the annual increase in the Maximum Assessment Rate for each

4. Assessment

Zone was calculated based upon the weighted average increase in LS-1 rates 39w LED and LS-2 rates 22w LED lamps and 84w LED lamps over the prior Fiscal Year. The Maximum Assessment Rate for each Zone has increased 1.59% for FY 2025-26.

In March 2019, the majority of the streetlights within the Services District were purchased from Southern California Edison (SCE), with the exception of a few streetlights that were not available for purchase. Prior to the purchase, SCE charged the City for both energy and operations and maintenance using the LS-1 Rate Schedule, which is updated periodically throughout the year, for all of the streetlights in the Services District. Since the purchase, SCE continues to charge the City using the LS-1 SCE Rate Schedule for all streetlights owned and maintained by SCE; however, for the streetlights purchased by the City, delivery-related, generation, and regulatory charges are now assessed based on the LS-2 Rate Schedule and The Services District has assumed responsibility for operations and maintenance, as can be seen in the Section 2 Cost Estimates (Tables 2-1 to 2-25).

All streetlights have been retrofitted, replacing the existing high-pressure sodium vapor (HPSV) lamps with energy efficient light-emitting diode (LED) lamps. As a result, the energy rates used to estimate costs for the City-owned streetlights are the LED rates from the LS-2 Rate Schedule, with a Public Utilities Commission effective date of March 1, 2025. The streetlights that were not available for purchase are still owned and operated by SCE and the costs have been based on the LS-1 E Rate Schedule with a Public Utilities Commission effective date of March 1, 2025.

As new parcels are annexed into the Assessment District, they will be subject to the same method of assessment apportionment as contained herein.

Duration

The duration of the assessments will be for as long as the lighting maintenance services are provided.
