Road Restoration Notice

October 29

JCSD's Regional Recycled Water Project is nearing completion, and crews are preparing for the final stage of road restoration in your neighborhood. This work includes applying slurry seals to the road surface.

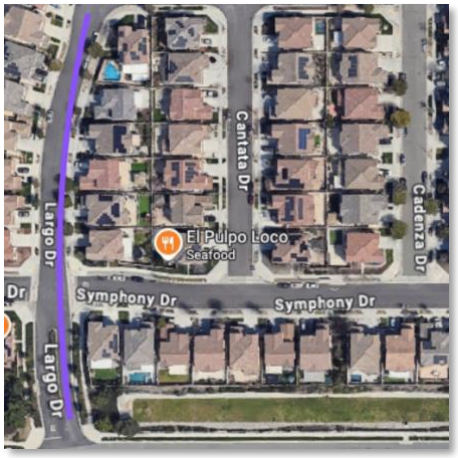

This marks an important step toward completing a project that will help conserve drinking water and strengthen our community's long-term water reliability.

Thank you for your patience throughout construction and as we complete this final work.

Work Location and Schedule

Affected Streets: Settler's Ridge Ct and Largo Dr

Thursday, October 29, 2026
7:00 am – 7:00 pm

These are scheduled work hours. Specific closure times and access restrictions will be provided on doorhanger notices and JCSD's interactive construction map, located at www.JCSD.us/RecycledWater. The Schedule is subject to change due to weather and field conditions.

What is Slurry Seal Application?

JCSD's contractors will apply a slurry seal to the road as a form of preventive maintenance. Slurry seal is an efficient and cost-effective method that reduces aging and prolongs the service life of asphalt roads. The application is an investment in road restoration.

11201 Harrel St. Jurupa Valley, CA 91752

What To Expect During a Slurry Seal Project in Your Neighborhood?

- Residents will receive a doorhanger notice 24 to 48 hours before work begins on their street, with specific instructions related to parking and access restrictions.
- “No Parking” signs will be placed in the work area 72 hours in advance. Please move vehicles, trash cans, and other objects off the street before the parking restriction begins. Vehicles parked in violation of posted restrictions may be towed.
- Slurry seal work is anticipated to take place from 7:00 a.m. to midday. Please note that even after contractors have completed their work, the street must remain closed to vehicle traffic to allow the slurry seal to fully dry and cure. Please do not drive on the street until it has officially reopened.
- Temporary road closures and driveway access restrictions will be in effect while crews apply the slurry seal and allow it to dry. Please review your doorhanger notice and plan ahead if you will need to use your vehicle during the closure.
- Emergency vehicle access will be permitted.
- Please allow extra time for travel and follow posted traffic instructions.
- The work will create noise, dust, and minor vibration.
